

# Computer Science 135: Diving into the Deluge of Data

## Contact Information

**Professor:** Brent Heeringa

**Email:** [heeringa@cs.williams.edu](mailto:heeringa@cs.williams.edu)

**Office:** Thompson Chemistry Laboratory 306

**Phone:** 413.597.4711

## Course Information

**Classroom:** Thompson Chemistry 206

**Lecture Time:** MWF: 09.00-09.50

**Lab Time:** Th: 13.00-14.20; 14.30-16.00

**Labs Due:** Tuesday evening at 23.00

**Office Hours:** Monday 10.00-12.00, Tuesday

**TAs:** Derrick Bonafilia, Devin Gardella, Victoria Jasuta

**Website:** [www.cs.williams.edu/~heeringa/classes/cs135](http://www.cs.williams.edu/~heeringa/classes/cs135)

# Course Focus

# Course Tenets

- Computing and computers are not magical.
- Computing, its tools, and its ideas are accessible to everyone provided they work hard and have an open mind.
- Programming requires practice; programming well requires significant practice.
- Computer science provides a language in which to think about and describe problems and their solutions; that language has practical import almost everywhere.
